DOVER STAMPING COMPANY,

MANUFACTURERS AND DEALERS IN

TINNERS'

Hard Ware & Furnishing Goods

Nos. 88 & 90 NORTH STREET,
BOSTON, MASS..

1884.

GUNN, CURTIS & CO PRS., 30 Hawley Street, Boston.

TO THE TRADE.

OUR Manufactures embrace the full lines of DEEP and COMMON STAMPED WARES ; TINNERS' TRIMMINGS ; JAPANNED and TOILET WARES ; ENAMELED, or PORCELAIN-LINED CAST-IRON HOLLOW WARES ; PLANISHED TEA and COFFEE-POTS ; WIRE GOODS ; FLAT-IRONS ; WARM-AIR REGISTERS ; WATER COOLERS ; ICE CREAM FREEZERS ; DOVER EGG BEATERS ; TABLE and BASTING SPOONS ; COAL HODS ; STOVE SHOVELS ; POKERS ; SIFTERS and SCRAPERS ; CARPET SWEEPERS ; TEA TRAYS ; TINSMITH'S TOOLS and MACHINES ; GRANITE WARE, &C., &C.

We have endeavored to so arrange and describe our various manufactures in these pages, that the trade may fully comprehend the sizes, weight and quality of each line of goods.

Extended list prices with large discounts, are only intended to deceive the buyer. We avoid them by publishing a net list, subject to no discount except for spot cash or large quantities. All prices are subject to change without notice.

DOVER STAMPING CO.

BOSTON, July, 1884.

DOVER STAMPING COMPANY,

88 & 90 North Street,

BOSTON, MASS., U.S.A.

PRICE-LIST

Acme Pieced Tin Ware,

Buffed.

WARRANTED.

Finding the Demand for

PIECED TIN WARE

to be a growing one, because these goods are rapidly taking the place of the *poorer grade of stamped ware* now almost universally occupying the market, we have resolved to turn our attention to its manufacture, in the belief that

A Nice Article of Tin Ware,

made of good stock and sold at a moderate price, is to be the

CULINARY WARE OF THE FUTURE.

We have adopted the name

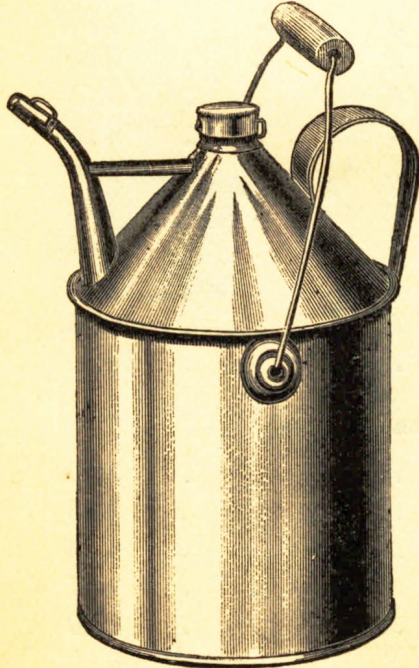

"ACME"

to denote our manufactures of **WARRANTED GOODS**, and we confidently assert that we offer the **BEST TIN WARE** in the United States.

PLANISHED AND NICKELED
COPPER TEA KETTLES.

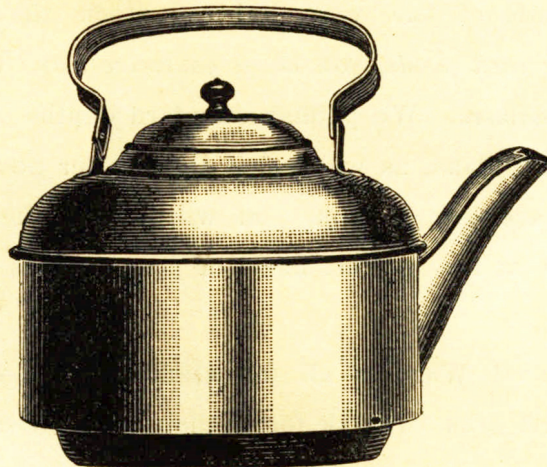

MEDIUM.

WITH PIT OR FLAT BOTTOMS.

1.75	2.00	2.25	2.50	2.75 each.
5	6	7	8	9 in.

Nickel Plating, 50 cents extra.

The bottoms are spun to continue up and form a section of the body, avoiding a seam at the bottom.

EXTRA HEAVY.

WITH PIT OR FLAT BOTTOMS.

2.25	2.50	2.75	3.00	3.25 each.
5	6	7	8	9 in.

Nickel Plating, 50 cents extra.

The Heavy Tea Kettles are of 30 oz. Copper, spun from the bottom in one piece up to the breast. This gives a bottom and body of great strength and durability.

The prices of Stamped Ware have been cut, out of spite and retaliation, so deeply, that *standard* goods of *full size, full weight and good finish*,—if furnished at the cut rates,—involve all who make them in a loss.

This condition of things has prompted most manufacturers to

REDUCE SIZES AND WEIGHT TO SAVE THEMSELVES
at the expense of the consumer.

The GOODS are reduced as much as the PRICES.

This pervades nearly the whole line of manufactures, but is particularly manifested in Milk Pans and Lip'd Sauce Pans. A No. 18 Lip'd Sauce Pan that will nest inside of our No. 16, and but two-thirds as deep,

SHOWS THE FRAUD.

A *standard* size six quart Dairy Pan is made from a sheet of tin sixteen inches square. Many makers are now using sheets but *fifteen* inches square. This saves about eleven per cent. in cost of stock. The Pan is smaller by just so much, but it is *labeled six quart, and sold for six quart*; and it is made of the very lightest stock that will work into it. *When you buy such goods, you cheat yourselves, and when you sell them you cheat your customers.* We publish standard depths and diameters of Pans and Lip'd Sauce Pans, as well as of some other goods, against our prices. If our goods are sent to you, you will obtain these sizes. If you buy smaller goods at less prices, made of poorer stock, you have not gained by it.

Our Stamped Ware is all full standard size, weight and finish; and far better worth what we ask for it than the depreciated ware so cheaply offered.

4 " 4 $\frac{1}{2}$ "	8.50
5 " 5 " "	9.00
6 " 5 $\frac{1}{2}$ "	10.00

Silver Finish.

Our Hinged Tea Pot Tops have Rims and Hinges with *double laps*, making them extra strong. The *finish* cannot be excelled.

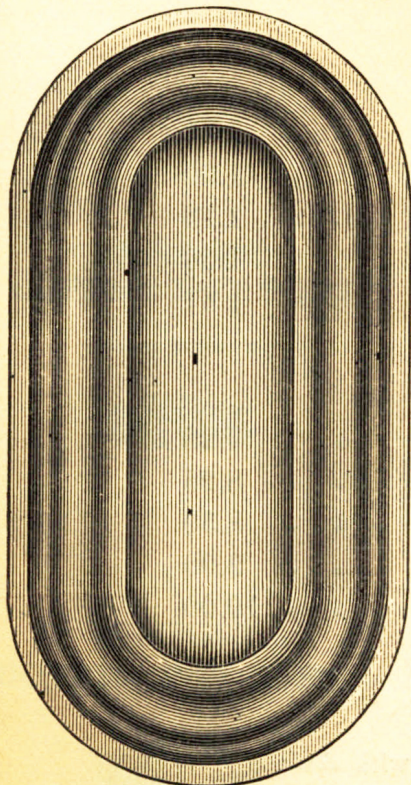

WASH BOILER COVERS.

	Extreme Outside Measure.	Doz.
6 inch,	$10\frac{1}{4} \times 19\frac{1}{16}$, . .	1.25
7 " "	$11\frac{1}{4} \times 20\frac{7}{8}$, . .	1.50
8 " "	$12\frac{3}{16} \times 22\frac{1}{8}$, . .	1.88
9 " "	$13\frac{3}{4} \times 23\frac{7}{8}$, . .	2.25

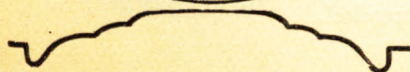

This forms a neat and economical top to a Wash Boiler, and supersedes those made by hand.

N. P. BOILER COVERS.

	Measure from Base of Bead.	Doz.
6 inch,	$8\frac{1}{8} \times 16\frac{3}{4}$, . .	1.25
7 " "	$9\frac{1}{8} \times 18\frac{7}{8}$, . .	1.50
8 " "	$10\frac{3}{8} \times 20\frac{5}{8}$, . .	1.88
9 " "	$11\frac{7}{16} \times 22\frac{1}{4}$, . .	2.25

To be used without an additional Rim. The flanges *outside* the bead cover the edge of the Boiler and complete a perfect fit. Measure is from base of bead to correspond with *inside* measure of Boiler.

PORCELAIN-LINED ICE-WATER URN.

NICKLE-PLATED FAUCETS.

This article will supersede the Ice-Pitcher on the Sideboard and Dinner-Table, and in Saloons, Offices, and all places where a pitcher is now used.

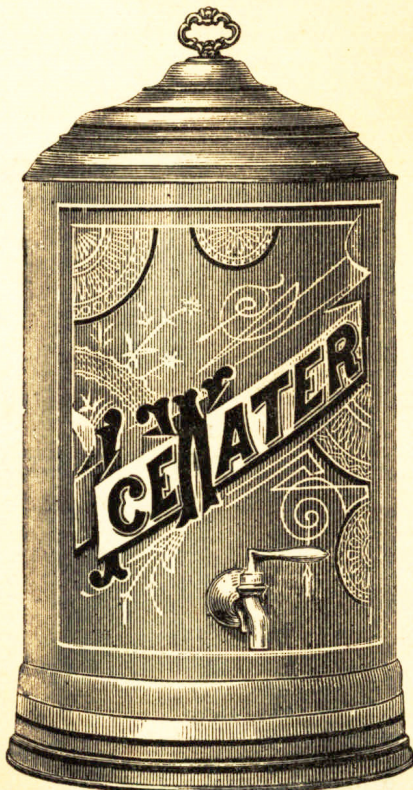

TANK MEASURE.

Diam.	Depth.	Each
5 $\frac{5}{8}$	10 $\frac{1}{2}$	4.75

WATER COOLERS.

NICKLE-PLATED FAUCETS.

VARIETY COLORS.

GALVANIZED TANKS.

	Diam.	Depth.	Each.
No. 2,	7 $\frac{1}{4}$	10 $\frac{3}{4}$	3.00
" 3,	7 $\frac{1}{4}$	12 $\frac{1}{2}$	3.50
" 4,	8 $\frac{1}{4}$	13 $\frac{3}{4}$	4.00
" 6,	9 $\frac{1}{2}$	15	5.50

ENAMELED OR PORCELAIN

LINED TANKS.

	Diam.	Depth.	Each.
No. 2,	7 $\frac{5}{16}$	11 $\frac{1}{2}$	5.00
" 3,	7 $\frac{5}{16}$	13	6.00
" 4,	8 $\frac{5}{16}$	14	7.00
" 6,	9 $\frac{9}{16}$	16	8.00
" 10,	9 $\frac{9}{16}$	21	15.00

Interchangeable with
self-closing Faucets extra.

The ENAMELED Tanks should supersede all others. The water is kept perfectly pure, there is no metal contact, while the cost is but a trifle more than the common article. Heretofore the price of Enameled Coolers has been so high that no one could afford to buy them; now they are within the reach of all.

WATER SPRINKLERS.

MOVABLE ROSE.

	Doz.
1 Quart, . . .	3.00
2 " . . .	4.25
3 " . . .	5.50
4 " . . .	7.50
6 " . . .	8.75
8 " . . .	10.00
10 " . . .	11.25
12 " . . .	13.50
16 " . . .	17.00

All our Sprinklers are now made with MOVABLE HEADS, which unscrew with an *eighth* turn. There is no joint in the tube, and no LEAKING. The screw is of *zinc* and *will not rust*. It is removed at a touch and the holes cleansed. The additional cost is more than made up by ITS GREAT CONVENIENCE.

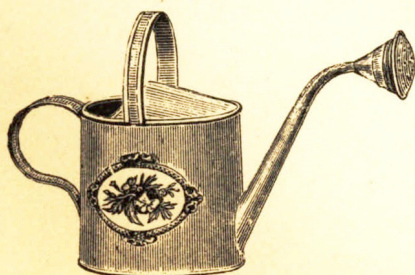

**MOVABLE
SPRINKLER-HEADS.**

PATENTED, 1875.

	Doz.
2 inch,	1.00
3 "	1.25
3½ "	1.38
4 "	1.50
3½ " Potato Bug,	1.38

The great advantage of these SPRINKLER-HEADS should induce all to use them. With these a sprinkler *costs but a few cents more*, while it is WORTH DOUBLE.

EGG BEATERS.

THE DOVER EGG BEATER

Has the distinction of being

ABSOLUTE PERFECTION.

It beats the *whites of two eggs in ten seconds*, so perfectly that the cup in which it is beaten, may be turned bottom up and no part of the beaten egg fall. An experienced hand will accomplish it in *five seconds*. It beats *six eggs, whites and yolks*, so that a *quart measure will not contain the quantity*. These things, or anything like them, cannot be done with any other Egg Beater.

It beats, mixes and aerates all kinds of *SOFT BATTER FOR CAKE, SALAD CREAM, FROSTING, SAUCES, &c., &c.*

Beating an egg is simply aerating its particles. Properly aerated or beaten, *one egg* will go as far as *three* imperfectly done. The price of such an Egg Beater is of no account. The Dover Beater, if it cost a dollar, would be cheaper than any other as a *gift*. It is the only article that will

PROPERLY AERATE OR BEAT EGGS.

And why? Because the Double Floats revolve ON TWO CENTERS ONE INCH APART. In turning they each interlace the other, working in the same space, drawing the egg away from the side of the vessel and into the middle and center of the whirling floats, where, by a thousand cross currents, it is cut, beaten and aerated *instantly*. Ten seconds trial will prove this.

It is WARRANTED TO PLEASE AND FULLY SATISFY ALL. If a purchaser is not delighted with it, the money paid will be cheerfully refunded. And this is our warrant. *There is not another article in the world so warranted.* Think of this and consider that we never had a Dover Beater returned or found fault with in all the

MILLIONS WE HAVE SOLD.

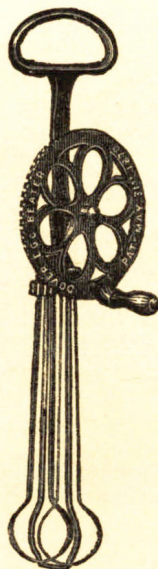

DOVER EGG BEATERS.

UNDER PATENTS,

May 31, 1870, May 6, 1873, and others.

TUMBLER SIZE.

No. 1.

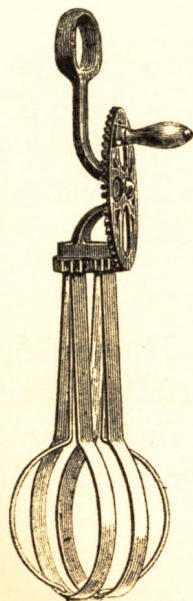

This size is specially designed for the sick room, or any place where a tumbler is used for beating a single egg or the mixing of any articles. In South America it is much used upon the table for stirring chocolate.

Price per dozen, . . \$ 3.00
 " " gross, . . 33.00

FAMILY SIZE.

No. 2.

The Family size is that in general use in most families, and the one which has found its way over the world. It beats the whites of two eggs so perfectly in ten seconds that the cup may be inverted without any of the beaten mass falling. Or it beats six eggs, whites and yolks, until a quart measure will not contain the beaten mass.

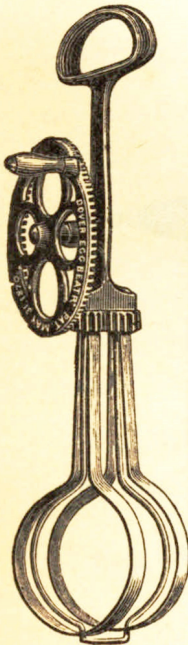

Sauces, Frostings, Sponge Cake and such things are largely increased in value by the application of this Beater.

Price per dozen, . . \$ 2.50
 " " gross, . . 27.00

DOVER EGG BEATER.

**EXTRA
FAMILY SIZE.**

No. 3.

This is a trifle larger than the Family Size, but much heavier and stronger, and well calculated for the heavier work of the kitchen — as beating all kinds of Batter, Salad Creams, etc., but it will do just as small work, and do it as perfectly, as the No. 1, while its great strength enables it to withstand the vigorous strain from Bridget's hand.

It may be used with the clamp fastened to the table (*see cut with clamp*), or is easily removed from the clamp and then used the same as the family size.

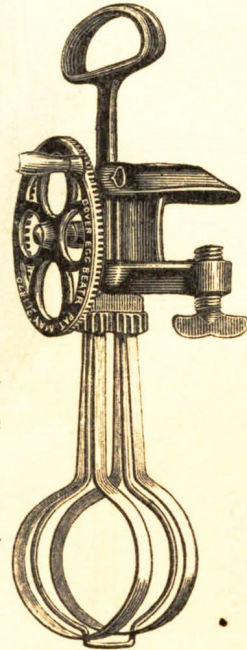

For ALL PURPOSES it is the most valuable of the Dover Beaters in the general household.

Price, with Clamp, per dozen, \$9.00.

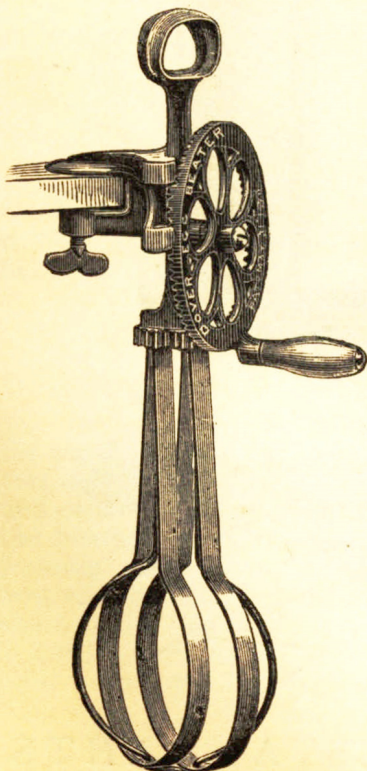

**EXTRA
FAMILY SIZE.**

With Clamp.

No. 3.

**MAMMOTH.**

No. 4.

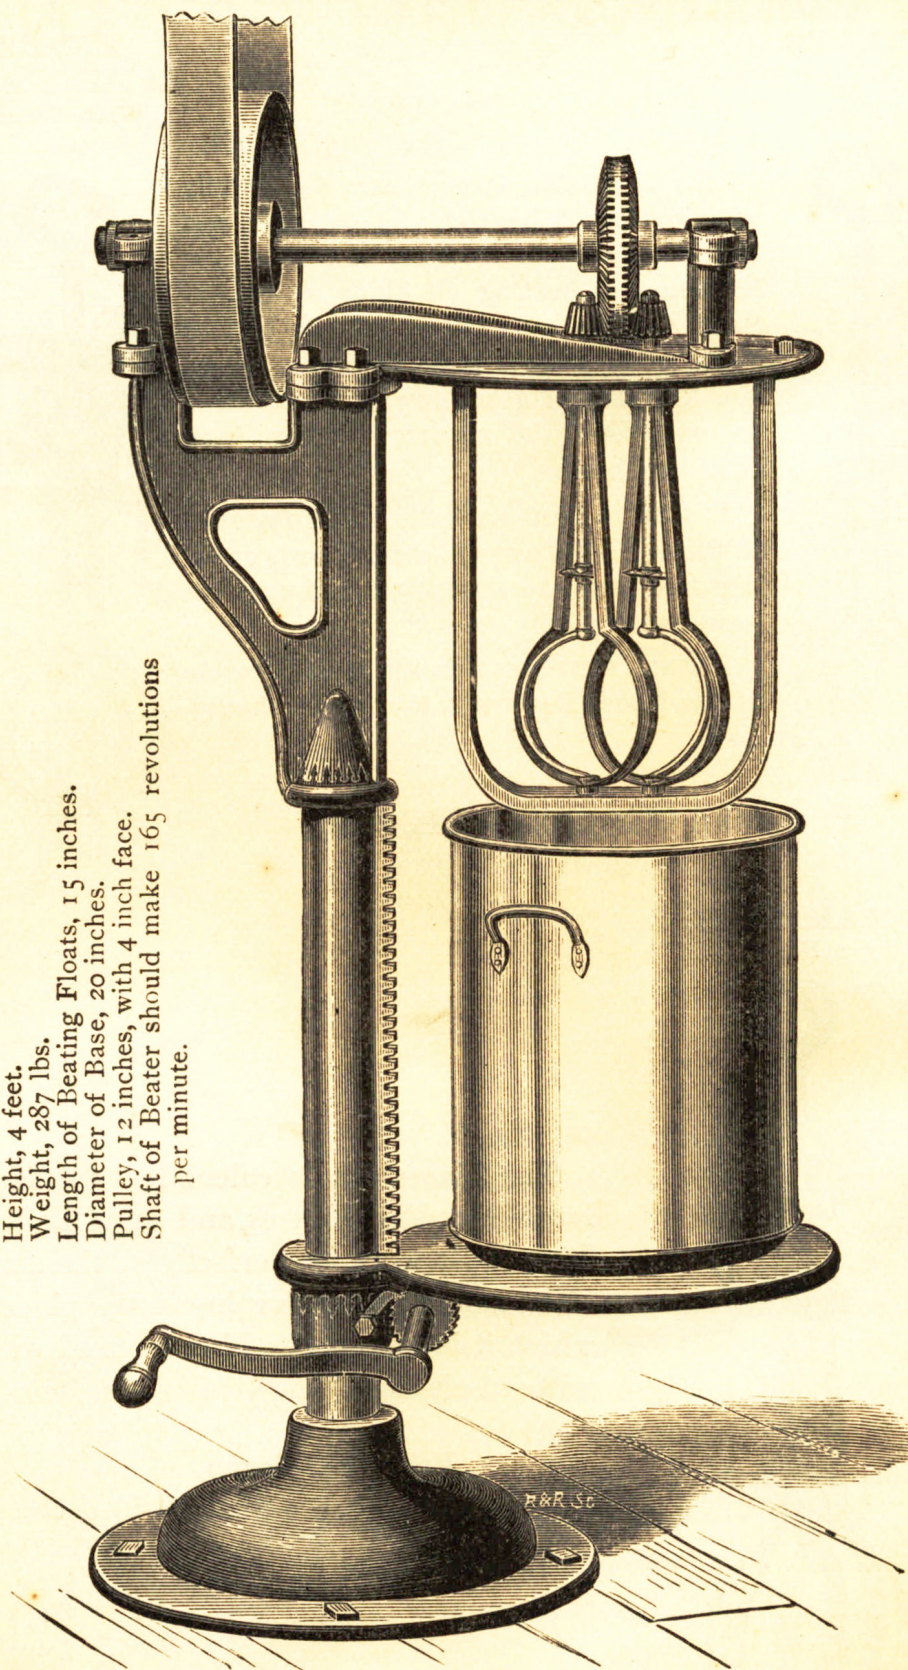

The Mammoth is calculated for Hotels, large Boarding Houses, and small Bakeries. It does its work as perfectly as the smaller sizes, and is of great value in the places for which it is intended. May be used with or without clamp.

Price, per dozen,
Less than a doz., \$3.50 each.

LEVIATHAN DOVER BEATER.

PRICE, EACH . . \$150.00.

Height, 4 feet.
 Weight, 287 lbs.
 Length of Beating Floats, 15 inches.
 Diameter of Base, 20 inches.
 Pulley, 12 inches, with 4 inch face.
 Shaft of Beater should make 165 revolutions
 per minute.

— FOR —
 BAKERIES, HOTELS, RESTAURANTS.

LEVIATHAN DOVER BEATER.

The constant demand for a
Thoroughly Effective Beater, of Great Capacity,

TO BE RUN BY POWER,

Has induced us to construct this machine. To any one familiar with the WONDERFUL QUALITIES of the ordinary size DOVER BEATER it will be sufficient to say that the LEVIATHAN has all its practical characteristics, with the additional strength and weight to adapt it to the purposes intended.

Its beating capacity is from two to sixty quarts, or even a larger quantity with a larger Can.

Eggs, Frostings, Cocoa Nut Paste for Macaroons, Salad Cream, and all articles in quantities used in large establishments, are thoroughly aerated and beaten in a few minutes to a

Perfection Impossible to Attain by any other Means.

We are confident that one of these machines will *pay for itself in twelve months* in any establishment of magnitude, in the saving of labor alone, without counting the perfection of the work.

DIRECTIONS. — In setting, the belt must draw vertically. The Can is filled and placed upon the movable platform. Turning the crank at the base lifts it to place.

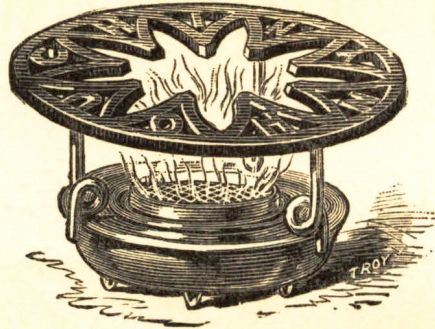

CAMBRIDGEPORT, MASS., August 23, 1878.

DOVER STAMPING Co.

Gentlemen : — I have now used your Power Dover Beater in my bakery for about six months, and it has given the utmost satisfaction. It is as perfect a machine for its work as can be produced, in my opinion. Its strength and capacity has never been approximated by any other machine. It does all the beating of every description required in my work, including sugar for frosting, paste for macaroons, any kind of soft cake dough, and it will also beat with the Can I now use, thirty-two quarts of eggs at one time, thoroughly and rapidly. Even at its present cost I am satisfied that it will *pay for itself in twelve months* in the work now produced by it. You are at liberty to refer to me, and I shall be most happy to make known its good qualities.

Very truly yours,

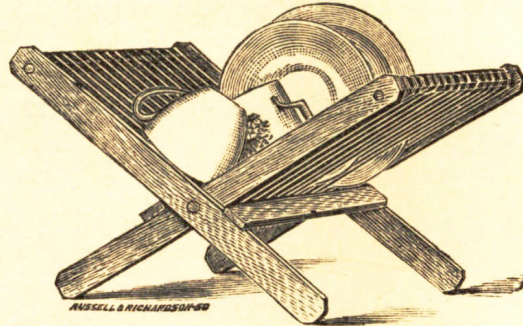

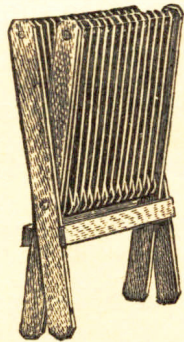

F. A. KENNEDY.

THE HUDSON PUSH-OFF PARER.

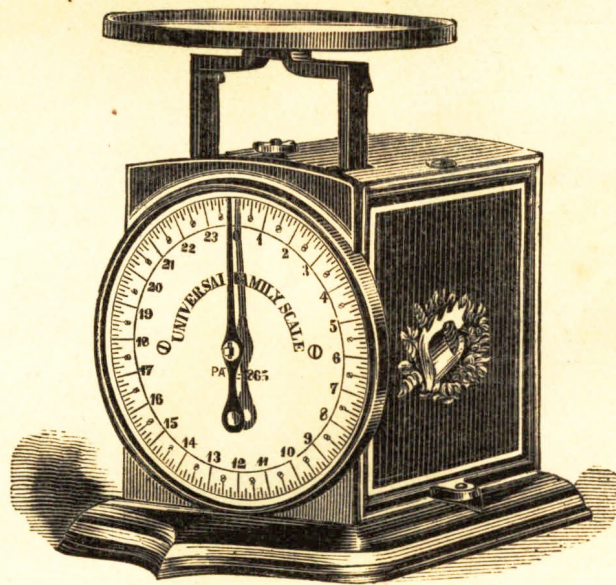

Doz.
9.33

We offer this Apple Parer in the full confidence that it will satisfy all who use it. The manufacturer fully warrants each machine. Every purchaser of this Parer in 1875 and 1876 pronounces it the best ever used.

U. S. DIAL SCALE.

WITH SOME DECIDED IMPROVEMENTS, SUCH AS BRASS AND
NICKEL-PLATED DIAL.

We would inform our customers and the trade generally, that we are now prepared to fill all orders without delay.

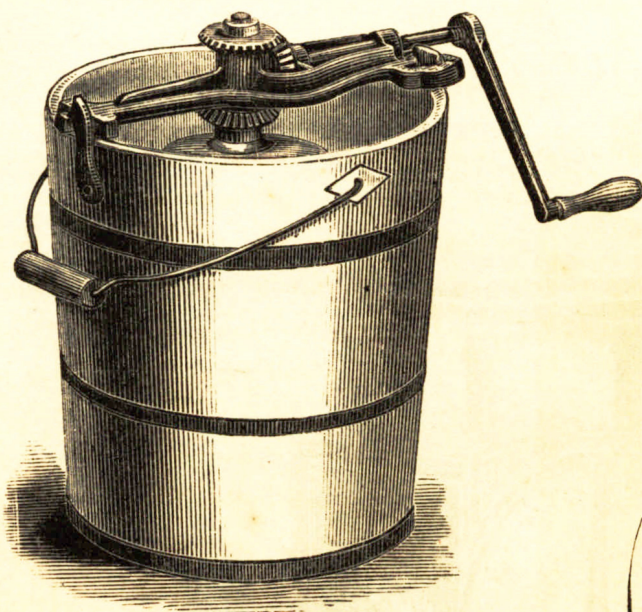

The ornamenting and the general construction of the Scale throughout is far superior to any Dial Scale ever before offered to the public.

 *Each Scale is thoroughly inspected and warranted correct.*

BISSELL

Noiseless Improved Carpet Sweeper.

THE BEST CARPET SWEEPER EVER MADE.

We have sold the

BISSELL CARPET SWEEPER

for several years. Our customers have never expressed the slightest dissatisfaction with it. On the contrary it has been an

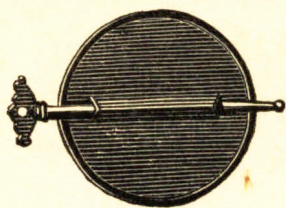

ABSOLUTE SUCCESS.

A better Sweeper is not made, and we know of none as good.

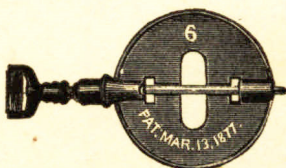

Will work equally well on the floor, Oil Cloth, Common, Brussels, or Velvet Carpet. A touch adjusts the revolving brush to any kind of work. Sweeps close to the wall. Does not scar the furniture.

NOISELESS, DURABLE, EFFECTIVE, ADJUSTABLE, DUSTLESS.

BARTLETT DOMESTIC PRESSES, WITH JELLY-BAGS,

FOR THE USE OF

FAMILIES, HOTELS, RESTAURANTS, AND BUTCHERS,

In pressing Corned Beef, Boiled Mutton, Tongue, Boned Turkey, Head Cheese, and other Meats. In making Lard, Beef-Drippings, Beef-Tea, &c., and in extracting the Juice from Fruits and Berries, for making Grape, Currant, or Apple Jelly, Wines, Cider, &c.

No. 1.	Square,	size 6 by 9,	by 4 inches deep,	Price, \$1.50
" 2.	"	" 8 by 12,	by 5	3.00

The "Bartlett," combines all the advantages of the Jelly-Bag with the power of a press, and will make perfectly strained jelly with very little work. The Jelly-Bag is not needed for meats.

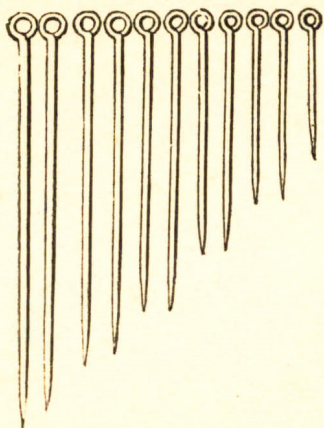

The cranks are so made that they can be turned with a lever in case great pressure is required, as in making beef-tea or lard. The pressure of a thousand lbs. can be easily got without fear of breaking the press. Each part can be washed as clean as a plate. The screw is easily pushed through the meat.

All meats to be eaten cold, are much improved by pressing. They retain their juices and look tempting, and have a more delicate flavor.

In the "Bartlett" Presses, the Plunger is drawn up, and the liquid drips down away from the material — obviously better than forcing the Plunger down.

Our Registers are manufactured under several valuable patents, COVERING THE CONTROL OF THE VALVES.

Placed at any angle, these Valves REMAIN MOTIONLESS.

This is a point of great importance, because it supersedes those contrivances in other Registers which *do not hold the Valves where they are placed.*

Those Registers whose valves will not stay at a fixed point, but instead, by the jarring of the floor, will close entirely or stand wide open, are not desirable. The public should understand this.

BOSTON, MASS., U.S.A.

PRICE-LIST

Tinners' Tools and Machines.

1884.

TINSMITHS' TOOLS AND MACHINES.

The Prices annexed constitute our Revised List, and include all changes made since the organization of the Peck, Stow & Wilcox Company.

TIN FOLDING MACHINES.

O. W. STOW'S PATENT ADJUSTABLE BAR FOLDER

Will turn locks from $\frac{1}{16}$ to $\frac{7}{8}$ of an inch in width.

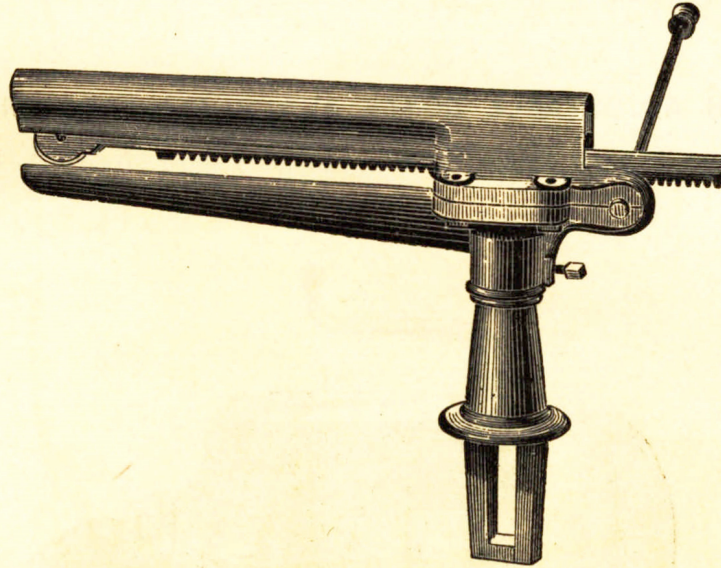

This simple and admirable Machine is decidedly *the best* in use. It forms a square joint, turns a narrow or wide lock, turns a round edge for wiring, and forms locks on very heavy plate with ease.

All the parts are now made by machinery, and are interchangeable, like a Waltham watch or Springfield rifle: that is, any part of one Machine is exactly like the same part in another.

A graduated scale is connected with the Gauge, whereby the operator can determine at a glance the width of the lock the Machine will form as adjusted.

No. 01.	30 inches, for Tin,		\$40 00
No. 0.	20 inches, for Tin,		30 00
No. 00.	17 inches, for Tin,		25 00

GROOVING MACHINES.

STOW'S ENCASED GROOVER.

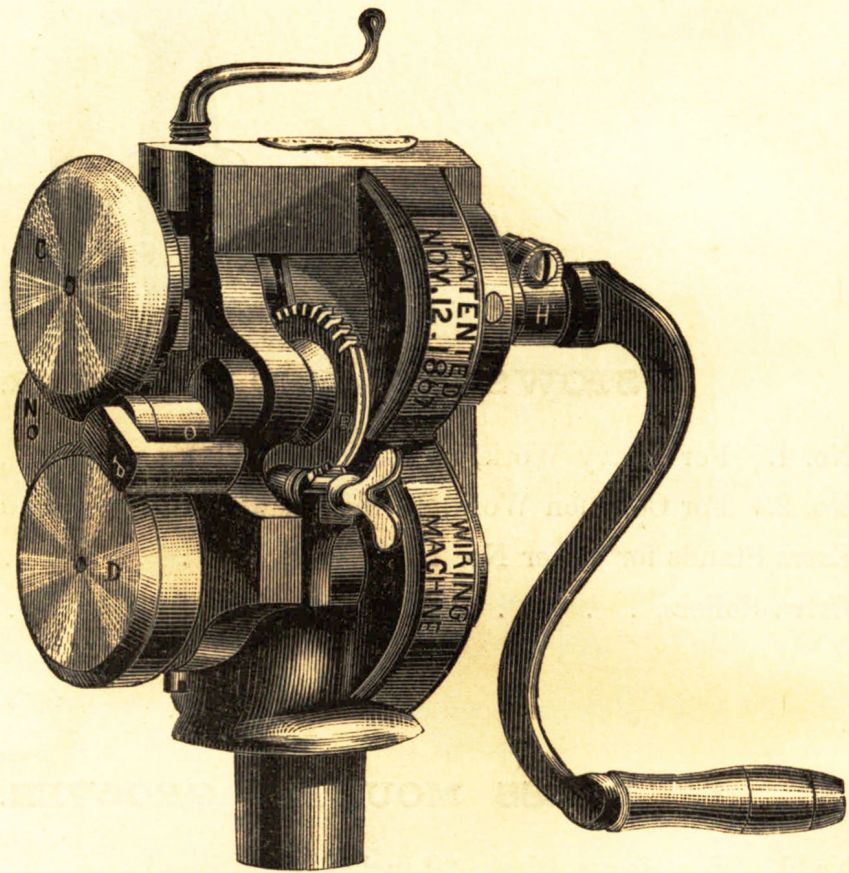

No. 1. For Heavy Work, 20 inches, with Rotary Stand, . . .	\$13 50
No. 2. For Common Work, 17 inches, with Rotary Stand, . . .	11 00
Extra Stands for either No. 1 or No. 2,	each, 75
Extra Rollers,	each, 75

BRASS MOUNTED GROOVER.

No. 1. For Heavy Work, 20 inches, with Stand,	\$13 50
No. 2. For Common Work, 17 inches, with Stand,	11 00
Extra Stands,	each, 75
Extra Rollers,	each, 75

STOW'S ENCASED MACHINES,

WITH ADJUSTABLE BOXES AND DUPLICATE PARTS.

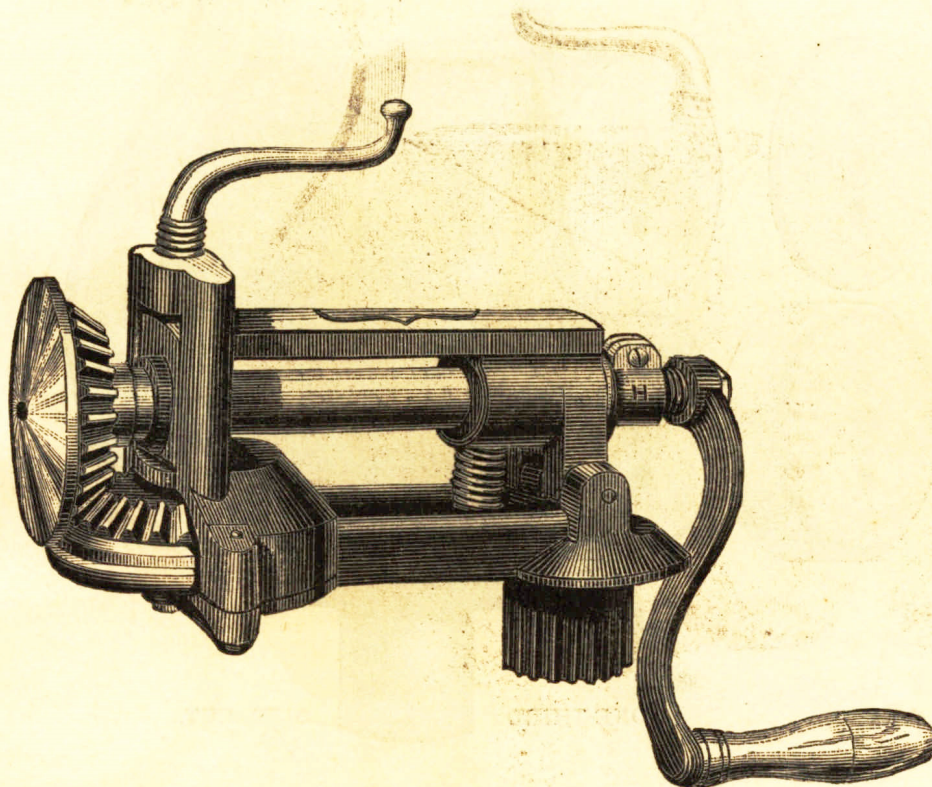

ONE THIRD SIZE CUT.

WIRING MACHINE.

Encased Wiring Machine, with Standard,	\$14 00
Encased Wiring Machine, without Standard,	13 25
Extra Faces always include Shaft,	2 50

Extra Standards for Nos. 4 and 5,	. . . each,	75

The impressions given are 1½ inch, 1 inch, ¾ inch, ½ round, O. G. Coffee-Pot, Colander, Elbow, Astragal, and any form required.

FORMING MACHINES.

STOVE-PIPE FORMER.

No. 000.	Extra Large, for Heavy Plate, Double-Geared, 3 inch Slip-Rolls, 37 inches long,	\$100 00
No. 00.	Double-Geared, 3 inch Rolls, 37 inches long,	85 00
No. 0.	For Cans, 2 inch Rolls, 37 inches long,	24 00
No. 1.	Stove-Pipe Former, 2 inch Rolls, 30 inches long,	19 00
No. 2.	Stove-Pipe Former, 1 $\frac{3}{4}$ inch Rolls, 30 inches long,	18 00
No. 1.	Tin-Pipe Former, 1 $\frac{1}{2}$ inch Rolls, 20 inches long,	10 00
No. 2.	Tin-Pipe Former, 1 $\frac{1}{2}$ inch Rolls, 16 inches long,	9 00
No. 3.	Tin-Pipe Former, 1 inch Steel Rolls, 14 inches long,	20 00
	Candlestick Former and Bearer, Steel Rolls, with Standard	20 00

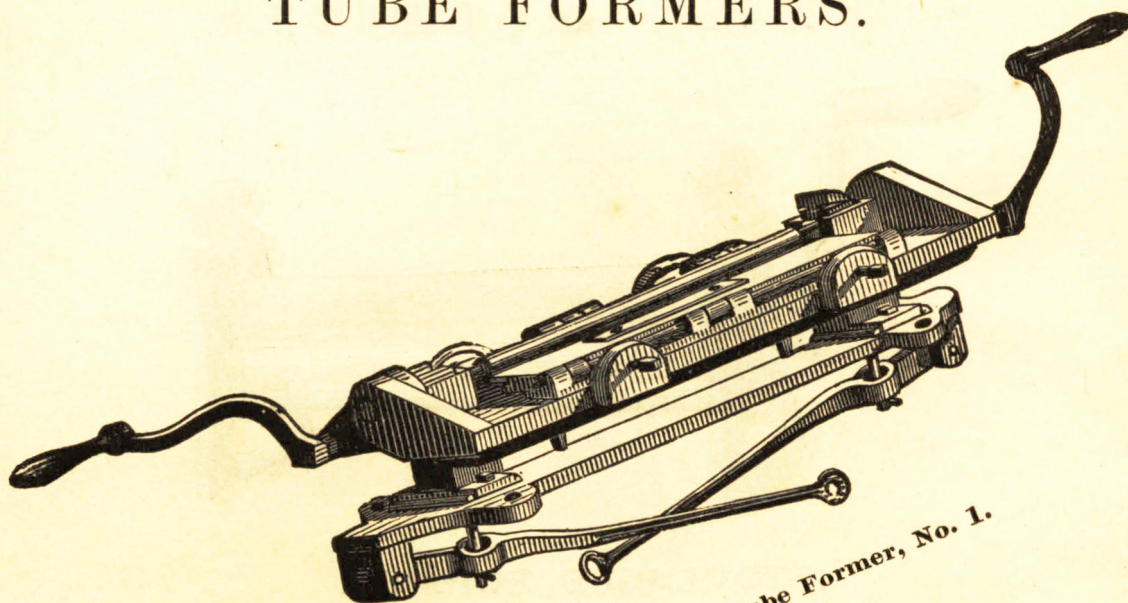

The No. 000 Former has been constructed especially for forming Tubing for Hydraulic Mining, or Water Works, where the great pressure demands extra heavy iron. It is so made that the roller around which the work is formed is easily removed from its journal, and the formed pipe is taken from the end of the Roller. It will form No. 14 iron.

The No. 00 Former is the same as the No. 000, with the exception that it has not the slip-roll.

The No. 3 Tin-Pipe Former is a new machine, made with a slip-roll, and parties desiring an excellent machine to form speaking-tubes, etc., will find this well adapted to their use.

It has steel rolls and cut gear.

TUBE FORMERS.

O. W. Stow's Patent Tube Former, No. 1.

STOW'S PATENT TUBE FORMERS.

No. 00.	To form Speaking-Tubes, 24 inches long,	\$60 00
No. 0.	To form Tubes, 15 inches long,	30 00
No. 1.	For Candle-Moulds or Ladle-Handles, 11 inches long,	25 00
No. 2.	For Teakettle Spouts, &c., 8 inches long,	20 00
No. 3.	For Rattle-box Handles, 5 inches long,	20 00
No. 4.	For Lamp-Tubes, 2½ inches long,	25 00
Extra Die Rod and Bed for No. 00,		6 00
Extra Die Rod and Bed for No. 0,		4 00
Extra Die Rod and Bed for No. 1,		3 00
Extra Die Rod and Bed for Nos. 2, 3, and 4,	each,	2 00

A large variety of Rods and Beds for special work at extra prices.

SPAULDING'S PATENT TINNER'S PRESS.

TINSMITHS CAN STAMP THEIR OWN COVERS!

Each Complete Machine will make the following size covers :

	Pail Covers.	1 Quart Coffee	Pot Covers.
1 Pint	" "	2	" "
1 Quart	" "	3	" "
3 Pint or 2 Qt.	" "	4	" "
4	" "	5	" "
6	" "	Wash Bowl Bottoms.	
10	" "		

Any other size can be made by procuring EXTRA HEADS, which will be made to order. *A Boy 15 years of age, with a single hour's practice, can make of either the above sizes Covers, from EIGHT TO TWELVE DOZEN PER HOUR, and in a style not excelled by any other process.* This simple machine revolutionizes the whole stamping business, by enabling

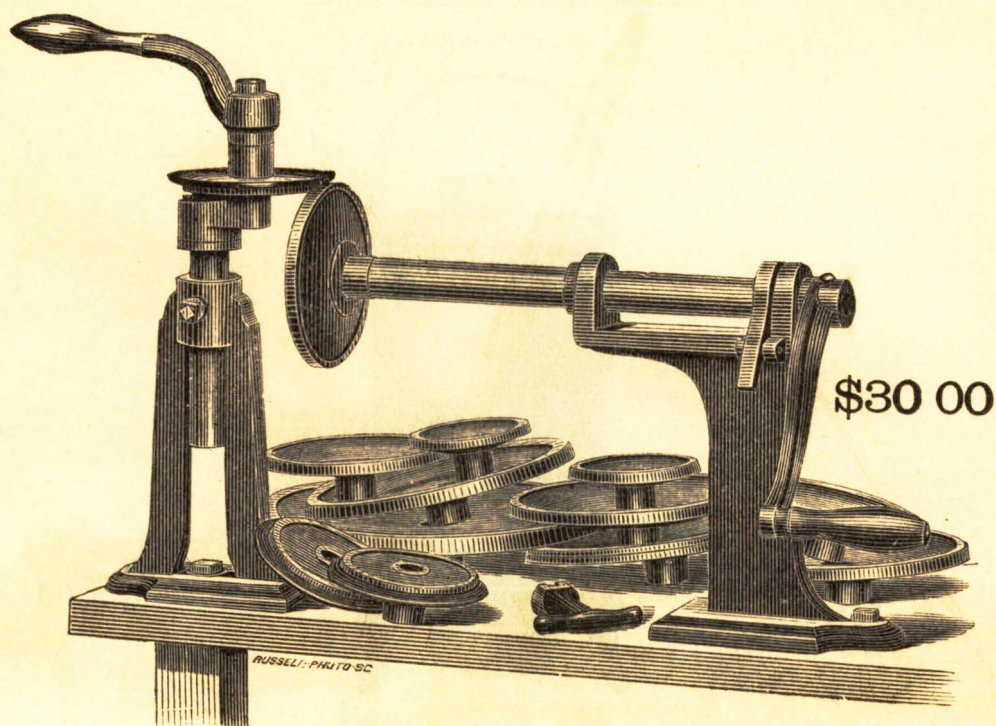

EVERY TINSMITH TO PRODUCE HIS OWN STAMPED WORK!

The Machine is NOT COMPLICATED, nor will it get out of order. Any person can fully comprehend it in a few moments. Stands upon the Bench, and takes no more room than a Beading Machine.

Tinsmiths readily concede that it is worth more than the price to make 2 quart Pail Covers only.

EACH MACHINE WARRANTED AS ABOVE.

SPAULDING'S PATENT DOUBLE SEAMER.

The only machine that will properly DOUBLE SEAM COFFEE POTS, and other FLARING WORK.

This DOUBLE SEAMER commends itself to all workmen upon REGULAR GOODS. Its SIMPLICITY and PERFECT WORK make it more desirable than any other. All ordinary TIN WORK, such as

COFFEE-POTS, or other flaring work,
MILK-PANS, CANS,
PAILS, DIPPERS,
WASH-BASINS, &c.,

can be DOUBLE SEAMED far MORE RAPIDLY, very MUCH BETTER, and by workmen who have had

LITTLE OR NO EXPERIENCE.

The objection to other machines—that it takes too long a time to learn to operate them—is done away in this. A new hand will take hold and work it at once.

For COFFEE POTS alone, this machine is worth far more than its cost.

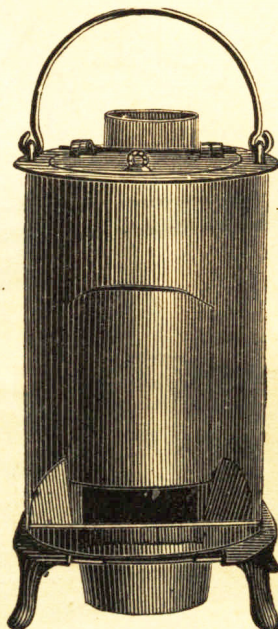

A SINGLE TURN OF THE CRANK, when IC tin is used, completes the seam. Hence its rapidity.

DOVER STAMPING COMPANY,

88 & 90 North Street, Boston.

TINNERS' FIRE POT.

FOR CHARCOAL.

DIAMETER, 8 INCHES.

HEIGHT, 14½ "

The Draft is in the rear of the bottom, and the Fire Pot may be kept full of charcoal without burning higher than is required to heat the coppers. This ensures the *greatest possible economy*.

Top and Bottom, Cast Iron, Body, Sheet Iron. Lined with Fire Brick.

FIRE POT COMPLETE.	{ Each,	\$3 00
